Summary

Full Stack Developer with over 9 years of experience specializing in .NET, Angular, and mobile development. Skilled in JavaScript, TypeScript, C#, and Kotlin, with a proven track record in ERP systems, web applications, and cross-platform solutions. Adept at building scalable architectures, optimizing performance, and applying clean code principles.

Experience

- July 2024 – Present 📍 Tehran

 Senior Angular Developer
Rahyab Rayaneh Gostar

Developed and maintained reusable Angular libraries to streamline front-end development processes. Implemented push notification systems for Android applications using Kotlin, enhancing user engagement and real-time chats. Collaborated with teams to integrate Angular and .NET Core solutions for scalable web applications.
- January 2022 – June 2024 📍 Tehran

 .NET Full Stack Developer (Angular Focus)
ZigmaPay

Migrated legacy applications to Angular 16, improving maintainability and performance. Converted template-driven forms to reactive forms in Angular, enhancing user experience. Implemented microservices with ASP.NET Core and Ocelot for scalability. Optimized performance with caching (MemoryCache, Redis), reducing database load by 40%. Customized Keycloak login screens with a FreeMarker plugin.
- January 2016 – January 2022 📍 Karaj

 .NET Full Stack Developer & Android Developer
Parsisa

Migrated a .NET Framework MVC app to .NET Core with Clean Architecture. Improved backend performance by 50% through code optimization. Reduced page load times by 30% with caching and refactoring. Developed cross-platform mobile apps using Xamarin.Forms.
- January 2014 – January 2022 📍 Iran

 Software Developer
Freelance

Built a ReactJS (NextJS) web app with OGP and SSR support. Created an ASP.NET Core Web API wrapper with RestSharp for XRPL API integration. Built APIs with ASP.NET Core and SQL Server; extracted IMDb data with HtmlAgilityPack.

Skills

 Front-End	TypeScript JavaScript HTML – CSS	Angular Ionic (Capacitor) ReactJS (NextJS)	Tailwindcss Angular Material Bootstrap
 Back-End& Dev-Ops	C# ASP.NET Core Entity Framework Core	SQL Server Redis	Jira Azure DevOps

Tools, Technologies & Concepts

 Docker	 Git	 Keycloak	 VS Code
 Figma	 Jenkins	 Gitlab CI	 Android Studio
Concepts OOP SOLID Principles Design Patterns Microservices			

Education

Ghiaseddin Jamshid Kashani University

Bachelor's degree, Computer Software Technology/Technician

Jan 2014 – Jan 2016
